9 February 2015

1. Question 3 in the Technical Requirements asks Respondents to provide a Project Execution Plan to define roles and responsibilities of its company and staff for a project. Does this mean a project that we are currently working on or one for the Husky Argentia Site?

Company Response

On the basis that this is an Expression of Interest (EOI), the Project Execution Plan can be “Typical” for similar work. Husky is not asking respondents to provide a specific plan for this work. Please be reminded that this is an EOI and that submissions are intended to help Husky determine if respondents are financially capable, technically qualified, have experience and can demonstrate they can execute what we need done.

EOI submissions are to be received no later than 3:00 P.M. NST on Tuesday, February 10, 2015.

Submission which is not received by the EOI/Pre-qualification closing date and time will not be given consideration as part of this Procurement process.
